June is HIV Testing Month and the **National HIV Testing Day** (NHTD) is an annual campaign produced by the National Association of People Living with AIDS (NAPWA-US) to encourage at-risk individuals to receive counseling and get tested. The US Department of Health and Human Services supports the **National HIV Testing Day**.

In observance of this day, thousands of HIV counseling and testing sites, state and local health departments, and community-based HIV/AIDS service providers will participate in NHTD events, by holding health fairs, providing community and media outreach, hosting special

testing-related events or operating extended hours.

For more information on HIV testing, or to find a testing

location near your area, visit www.hivtest.org, a service provided by the Centers for Disease Control and Prevention

Get tested – Know your status!
